

# **SOLVING CLIMATE CHANGE**

With Innovation, Technology, & Investments

**MAKE THE CHANGE**

(<https://massivefoundation.org/engage-with-us/>)

## **PLANETARY VISION**

Massive Earth Foundation has embarked on the great quest to solve global warming and climate change by fostering climate tech, entrepreneurship, investments, and innovation. We envision a large-scale ecosystem that nurtures & supports the growth of human as well as natural life. Thus, we've brought climate heroes like entrepreneurs, scientists, leaders, investors, and international organizations into a single platform to raise & deploy capital for climate finance and build

inn... technology that solves climate change.

(<https://massivefoundation.org/>)

Our goal is to create a paradigm shift that transforms the threat of climate change into an opportunity to build a cleaner, healthier, and livable planet that's home for all. We aim to achieve the same through study, research, projects, funding, events, co-working, partnership, and technological innovation.

## WHAT DO WE DO?

**PROJECTS**

**INNOVATION**

**RESEARCH**

**EVENTS**

MEF envisions the development of a human world that co-exists and thrives alongside natural ecosystems. To achieve a symbiosis between nature and civilisation, we've set up projects in areas where the two worlds intersect – city infrastructure & wildlife, human & animal habitat, agriculture & forest, etc. Our goal is not just to solve global warming pollution but also to create a lush and livable natural habitat for the whole world.
